Cert HTML

In January 1998, Fook Tin was certified in ISO 9001. The ensured the company-wide implementation of the highest standard of quality management. ISO 9001 is the most popular and widely used quality assurance management system. This system applies to organizations that design, develop, produce, install, and service product. ISO 9001 enables a company to demonstrate its commitment to quality and customer satisfaction as well as continuously improving its quality systems. The system is based on eight quality management principles:

- Customer focus
- Leadership
- Involvement of people
- Process approach
- System approach
- Continual improvement
- Fact based decision making
